

6516208212.txt

Immediate access to accurate weather and traffic information is helpful to local Law enforcement to reduce congestion on roadways, and it is an enhancement to safety for all who travel on public Highways. It is imperative for a Trucker to be able to route around potential road hazards and other weather related problems to roadways, and to avoid traffic snarls and congestion. Thank you for your attention and consideration in this matter. I am fully in favor of XM Radio's Instant Traffic and Weather Programming.
